

Together Innovation Works

zabala
INNOVATION

EU version

We are Zabala Innovation, the leading international consultancy firm in innovation strategy and R&D&I financing.

Since 1986 we have been accompanying our clients in their innovative drive to turn it into the key factor of their competitiveness.

With this document we would like to invite you to get to know us a little better. Because our experience says that...

...Together

Zabala Innovation in the world

15
offices

5
countries

15
partners

+670
people

Our track record includes **more than 10,000 client entities**. That means thousands of projects, but above all millions of ideas, a lot of work and enthusiasm. Because at Zabala Innovation, wherever you come from, we can help you.

Wherever you come from...

We will focus on you and the way you innovate. We work with:

SMES & STARTUPS

There are many ways of financing SMEs and Start-Ups and we can guide you and advise on opportunities that best suit your needs.

Project writing and management/Project Support activities/Cascade Funding/EU Platforms and initiatives/Innovative Strategy/Studies and diagnoses

LARGE COMPANIES

Public funding is a good opportunity for external financing to help boost your business projects.

Project writing and management/Project Support activities/EU Positioning/Cascade Funding/EU Platforms and initiatives/Innovative Strategy/Studies and diagnoses

RESEARCH & ACADEMIA

We seek to fund ambitious projects through the association and coordination of teams, in order to position European research entities among the international scientific leaders.

EU Platforms and initiatives

Zabala Innovation has developed its expertise in establishing and managing European Platforms of experts, starting with the management of the Smartgrids European Technology Platform back in 2008. Since then, Zabala Innovation has been involved in the coordination and support of different initiatives of strategic relevance for the EU.

10+

*projects and
contracts with the
EU Commission*

Studies and diagnostics

We collaborate with public administrations to promote innovation and assist companies in integrating innovation into their overall strategy through planning, the analysis and evaluation of projects, programmes, plans, strategies, R&I policies, innovations, technologies, industry and entrepreneurship.

40+

European Studies

Innovation Strategy

We guide companies through the definition and implementation of tailor-made innovation strategies, that allow them to tackle any transformational challenge in a coordinated and effective manner. The perfect link between the definition and development of new products or services and an organisation's overall business strategy.

Key partner in EU initiatives

At Zabala Innovation we have been working on **EU funding programmes since 1986**. This has provided us with competences that allow us to adopt different roles:

COMMUNICATION,
DISSEMINATION AND
EXPLOITATION

EU PLATFORMS
MANAGEMENT

PROJECT
MANAGEMENT

PUBLIC PROCUREMENT
OF INNOVATION

POLICY ANALYSIS &
RECOMMENDATIONS

CASCADE
FUNDING

SOCIAL INNOVATION
AND ETHICS

Our working model

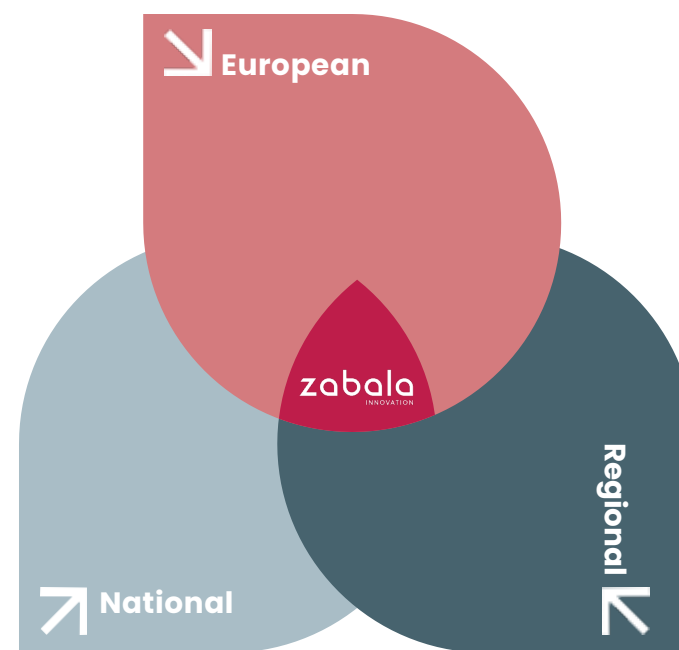

Integrated innovation management

Understanding innovation as a whole that transcends reality is the only way to innovate. Knowing everything to evolve your company. Working hand in hand to revolutionise your goals.

We work on:

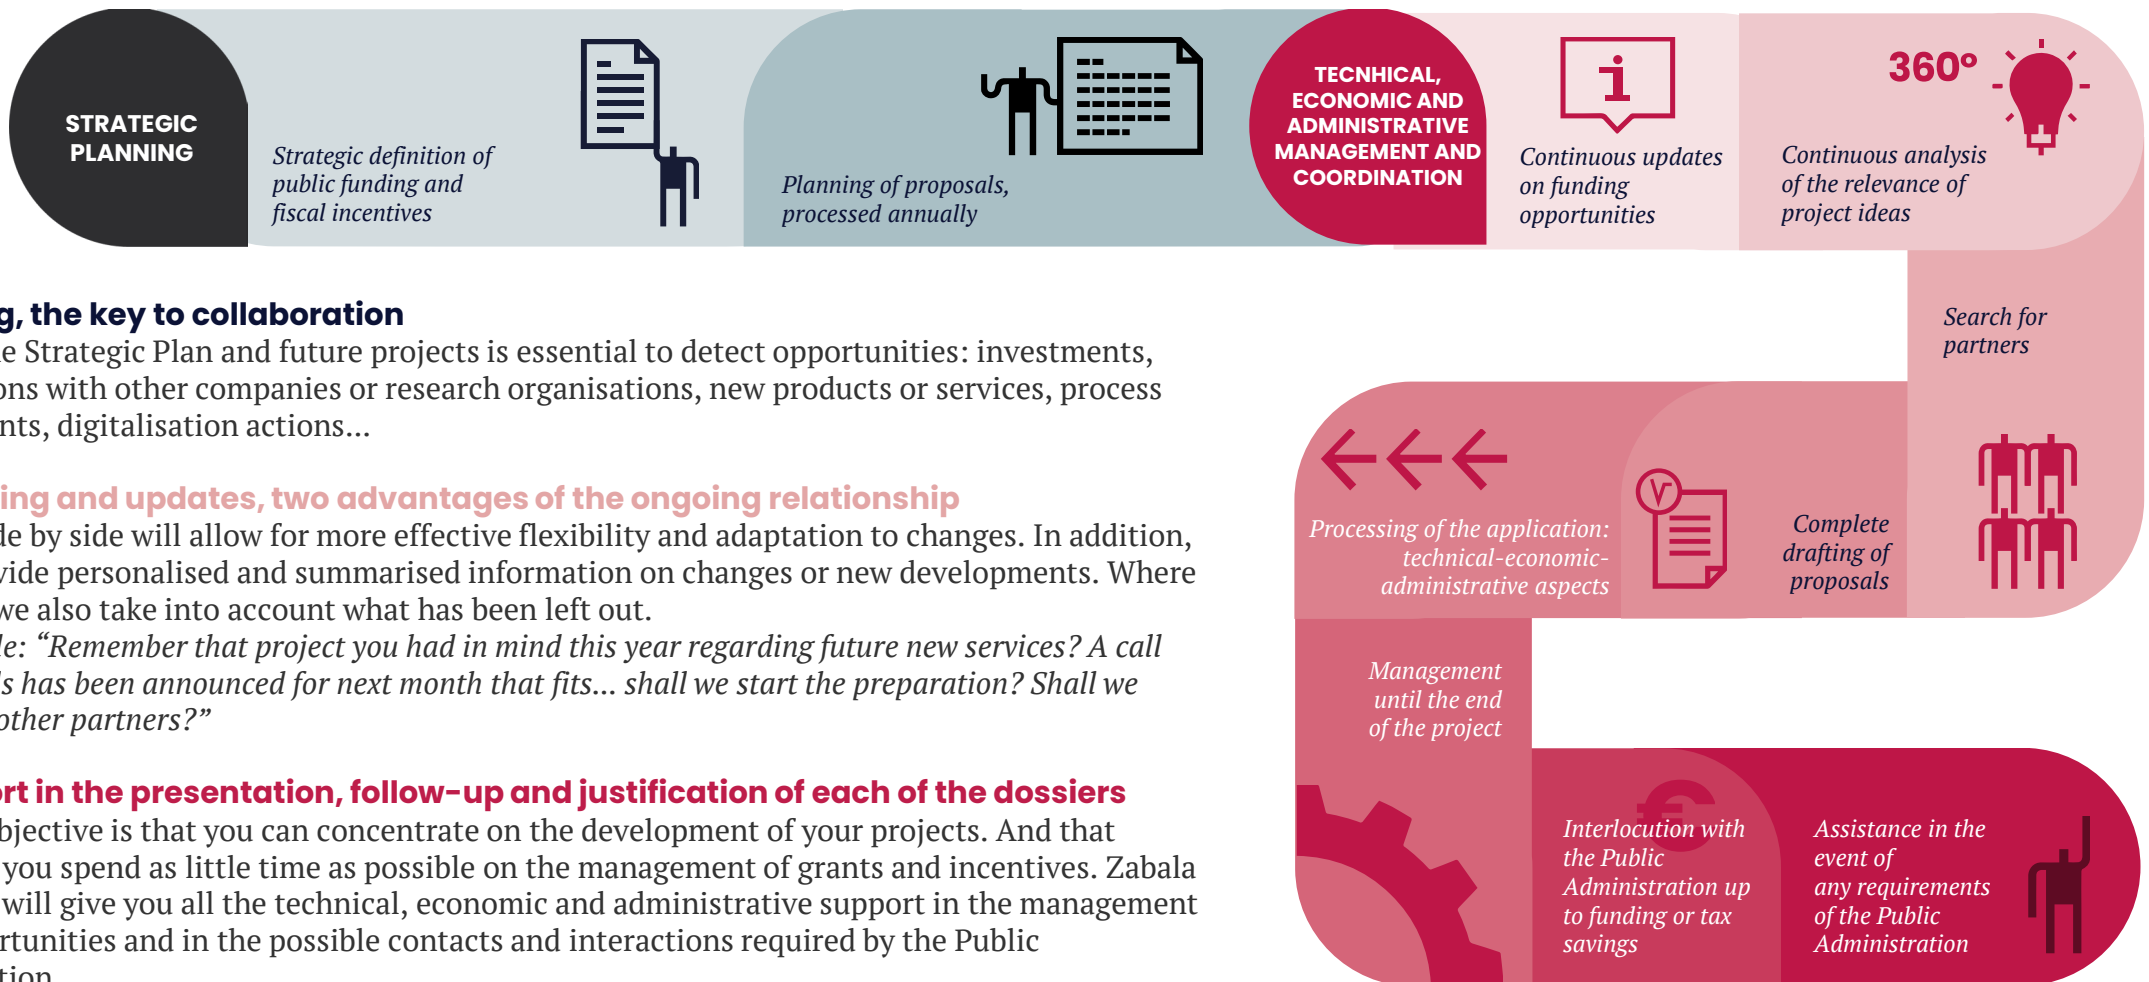

- R&D&I
- Investment, digitalisation and competitiveness
- Energy efficiency and environment
- Recruitment of research personnel
- Internationalisation
- Sustainability

And, for all of them, we have developed an efficient and rigorous work method, which we develop through identified milestones, to maximise funding for your activities and investments while minimising your commitment.

Our methodology

Innovation is the path, accompanying you is our destiny. We believe in a methodology based on total support, from the idea to the end of the project's life cycle.

1st Sharing, the key to collaboration

Knowing the Strategic Plan and future projects is essential to detect opportunities: investments, collaborations with other companies or research organisations, new products or services, process improvements, digitalisation actions...

2nd Planning and updates, two advantages of the ongoing relationship

Working side by side will allow for more effective flexibility and adaptation to changes. In addition, we will provide personalised and summarised information on changes or new developments. Where necessary, we also take into account what has been left out.

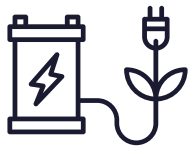

Real example: "Remember that project you had in mind this year regarding future new services? A call for proposals has been announced for next month that fits... shall we start the preparation? Shall we contact the other partners?"

3rd Support in the presentation, follow-up and justification of each of the dossiers

Our main objective is that you can concentrate on the development of your projects. And that means that you spend as little time as possible on the management of grants and incentives. Zabala Innovation will give you all the technical, economic and administrative support in the management of the opportunities and in the possible contacts and interactions required by the Public Administration.

Areas of expertise

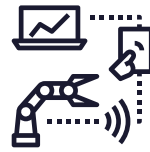

**We organise ourselves in Knowledge Areas (KAs) according to areas of expertise.
In this way, it is the project that is important, not the sector.**

ENERGY

MOBILITY

**INDUSTRY
& DIGITAL**

ENVIRONMENT

**BIOECONOMY
& AGRO**

**SECURITY, SPACE
& DEFENCE**

**SCIENCE &
EDUCATION**

REGIONS

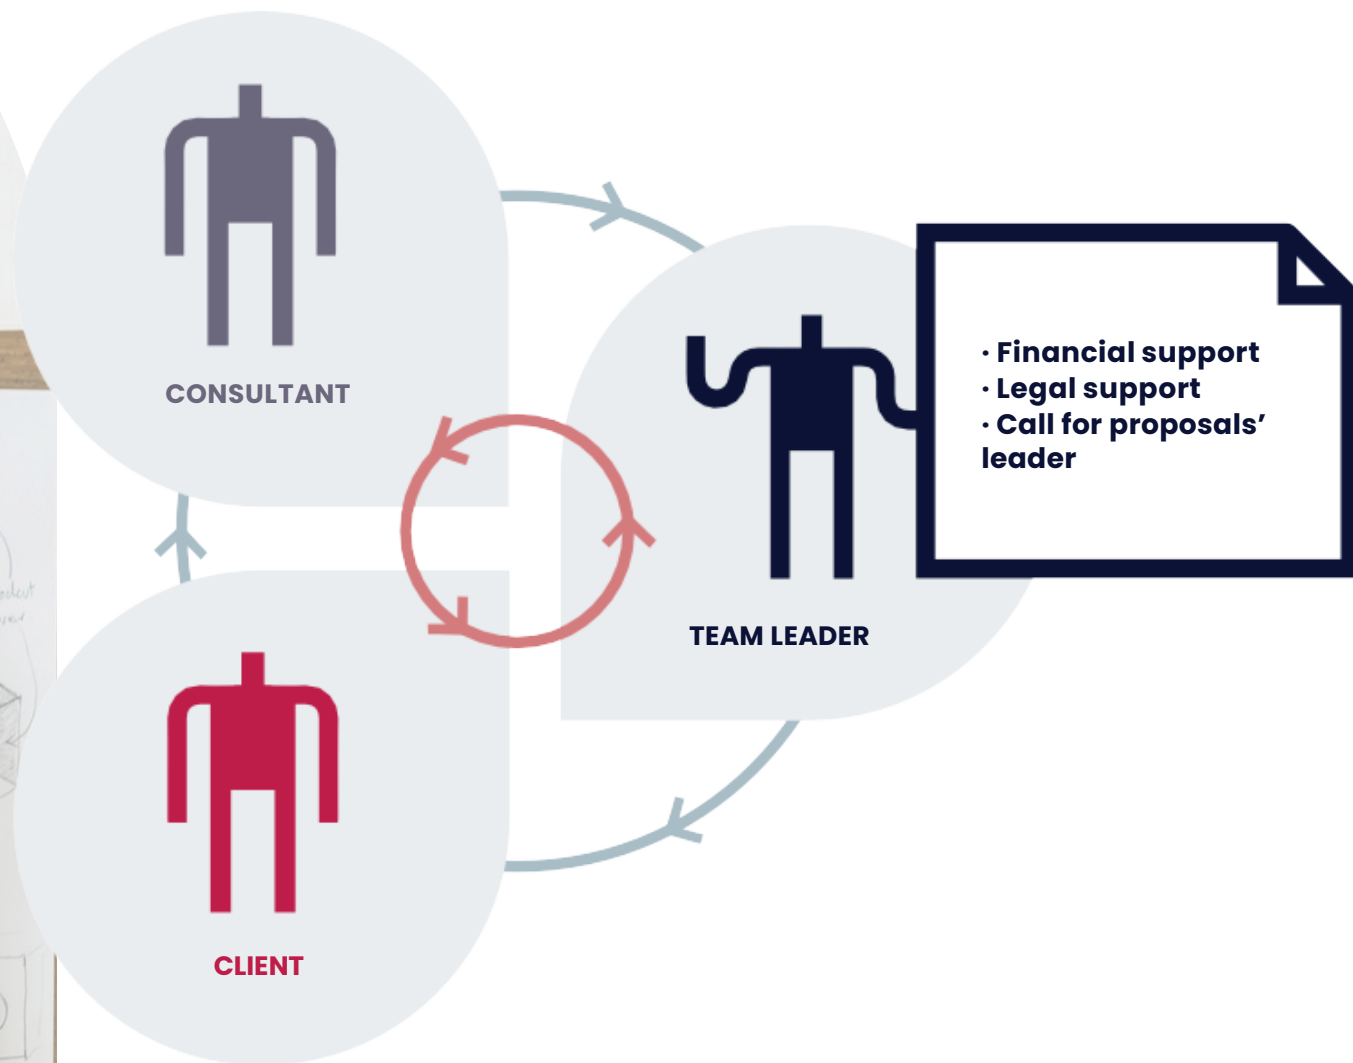

INTERNATIONAL

ENTREPRENEURSHIP

Teaming up

The best way to tackle each project is to work together, forming a highly qualified multidisciplinary team.

OUR DNA European spirit

130+ European projects and studies.

We lead some of the most cutting-edge projects and studies that, thanks to innovation, help to solve European problems with an international approach.

In many others, we participate as an **expert partner** in horizontal activities: Cascade Funding (Call management); Dissemination and communication; Exploitation of results; Social impact; Management of knowledge platforms.

**We
have it
very
clear**

Our mission

We are committed to our customers. We help them innovate in a global market: we anticipate their needs with loyalty and efficiency.

We are a benchmark in the management and public financing of R&D&I projects. Thanks to our experience, we stand out in the innovation ecosystems of innovative companies, universities, technology, and research centres, R&D units, investment companies, and public administrations.

We promote strategic alliances between the agents of this network to create value.

We believe that there is a historic opportunity for Europe to lead the transformation to a more social and sustainable world, with more equality serving all people.

The Sustainable Development Goals are the beacon of this journey, **and the journey is led by people.**

At Zabala Innovation we develop as professionals and serve the society to which we belong.

Our values

→ TRUST

Trusting others and deserving the trust of all people.

→ INTEGRITY

Respect and be ethical with customers, suppliers, the society and the environment.

→ COOPERATION

Work as part of a team, contributing ideas that benefit the company, customers and suppliers.

→ INNOVATION

Encourage and manage change by taking initiatives and risks in moderation. Acquire and share knowledge with each others.

→ COMMITMENT

Fulfill all commitments and agreements that the Company has freely entered into.

→ FREEDOM AND RESPONSABILITY

Living in freedom by accepting responsibility, as well as the results and consequences of one's actions.

Our vision

Our roots are our culture and values, our commitment to our customers' needs. We have become a leader, and we will continue to grow sustainably if we take care of those roots.

To this end, we have to face new challenges: the opening up to an increasingly global world, the impact of new technologies on a society that demands sustainability, equality, and balance with nature. The Zabala Innovation tree takes care of its consolidated branches, others have recently emerged and we will generate new ones in the future.

We have learned to take care of each project, now it is up to us to preserve the whole ecosystem.

PROJECTS

PROJECTS

Innovation Decalogue

1. Integrating innovation into the company's overall strategy.

Innovation benefits the productivity of the company and becomes the key factor in the competitiveness of organisations.

2. Management itself must take ownership of the innovation process.

Management must invest time in innovation and put all resources in hand to monitor, protect, incentivise and control it.

3. Always innovate with the market in mind.

Innovation starts from the identification of market needs. It only makes sense to the extent that it succeeds in satisfying them.

4. Facing risk.

It takes a strong condition to go against the tide. Without risk, there is no failure, but there is no success either. You must be flexible and open to change. Being risky should not mean being reckless.

5. Delegating and concentrating on one's know-how.

Management must be involved in what is to be done and what for. Leave the how to an expert team.

6. Innovate it's ok, but in a planned way.

Define budgets according to objectives. Conduct technology watch, prepare an analysis of the situation, and demand results within a reasonable timeframe (neither in the short term nor too late).

7. Formalising ideas into innovation projects.

Projects are tools for developing an innovation strategy. They are the only way to qualify for financial aid and incentives. They must be based on three basic pillars: technical, commercial, and financial.

8. Cooperate as much as possible with companies and research organisations.

In terms of innovation, one plus one is much more than two. Collaborate with Technology Centres and universities, through contracts that transfer knowledge. Cooperate with companies that complement the company's activity.

9. Allocate reasonable material and human resources.

Dedicate skilled staff to come up with ideas and to capture the good initiatives of others.

10. Facing the future by integrating the Culture of Innovation in the company.

Innovation, together with cooperation and internationalisation, are the keys to the 21st century. Only through a knowledge-based economy will it be possible to face the challenges of a globalised market.
